Janette D. Pell, Director

Helen McCann, Department Administrator

## REQUEST FOR QUALIFICATIONS PS- #1134 ENGINEERING SERVICES FOR STORM DAMAGE REPAIR QUESTIONS AND ANSWERS

*Updated:* June 27, 2011  
June 22, 2011

- 
1. *On Page 4 – Fourth Bullet under References it states “Include dollar value related to the participation.” Does this mean the dollar amount of our services expended on the project?*

Yes, the dollar value paid to your firm and its subconsultants.

---

2. *On Page 5 & Page 11, and Page 42 – DBE Requirements the UDBE goal is listed as 0% on Pages 5 and 11, and the UDBE goal is listed as 6.5% on Page 42.*

*A) Which one is it?*

*B) It appears the proposed scope of work will not require us to obtain subconsultant services. If subconsultants are not necessary, and if the UDBE goal is 0%, must we still solicit UDBE subconsultants for a Good Faith Effort??*

2a. The agreement is a sample only. The correct UDBE is 0% as specified on page 5 and 11.

2b. Soliciting subconsultants is not required.

---

3. *On page 6 of the RFQ, Item C: Lopez Drive Culvert Repair (1060’ west of Talley Road), does Talley Road refer to Talley Farm Road?*

No, Talley Road is a newer subdivision road not shown on Google. The culvert is approximately 1400' east of Orcutt Road.

---

4. *Most of the projects in the detailed scope of work in the RFQ seem to be primarily grading/drainage design. The Los Osos Valley Road Drainage Repair project includes (possibly) minor roadwork. Would this roadway work included in the Los Osos Valley Road Drainage Repair Project generally be typical of the “roadway engineering” aspect in the Project Scope?*

As noted in the RFQ, demonstration of experience with Caltrans and FHWA projects is important. For the Los Osos project, the consultant will base the drainage recommendations including roadway, if needed, on the topographic map and hydrologic study.
